

## tilo makes care fun!

### When caring for your floor, remember: everything in moderation!

Your floor always works hard for you and has to deal with a lot of stress. By way of thanks, treat it to a bit of care every now and again.

### Why do I need to care for my floor?

To protect it! Just like looking after yourself, floors too occasionally need some care. Every time it is used, a tiny amount of the protective layer of the floor is removed. Caring for it restores this layer and the floor remains hard-wearing and beautiful for much longer.

### Which is the right care product?

QUICK CARE when the floor is first installed. Then apply QUICK CARE about 1-2 times each year.

Use the appropriate INTENSIVE CARE after applying INTENSIVE CLEANER or roughly every 1-2 years, as required by the floor (e.g. if the floor looks washed-out).

## How often is cleaning and care needed?

CLEANING

With normal soiling,  
roughly every 2 weeks

With heavy soiling,  
as needed

INTENSIVE CARE  
is needed after this!

CARE

For the first care,  
then 1-2 times per year

Roughly every 1-2 years  
depending on use

# Maintenance & care

## tilo makes cleaning child's play!

### When cleaning, remember: less is more!

You should always use the most gentle type of cleaning and the matching cleansing agent - tilo makes this child's play.

### Why not just use the cleansing agent from the shop?

Because this can damage the surface - tilo cleansing agents are perfectly tailored to the tilo products.

### Which is the right cleansing agent?

As a rule of thumb: try dry cleaning first! Often sweeping and hoovering will do the trick. They are the gentlest types of cleaning.

When sweeping or hoovering are no longer enough, use SOAP CLEANER (approx. every 2 weeks).

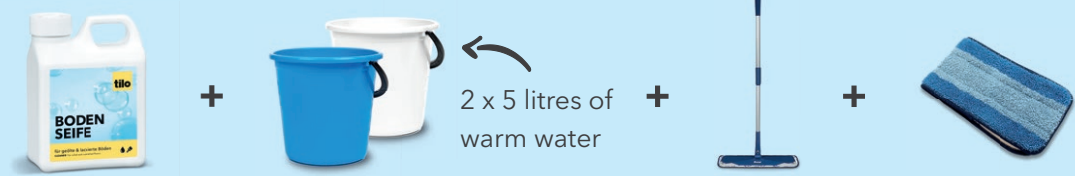

Only use the INTENSIVE CLEANER for heavy soiling (e.g. tough stains, unsightly discolourations). Make sure to use the appropriate INTENSIVE CARE afterwards - it's an absolutely must!

# Soap Cleaner

You need:

1

## SWEEP/HOOVER

Remove coarse dirt with a broom or Hoover.

2

## PREPARE THE CLEANING SOLUTION

Shake out the SOAP CLEANER and add 50 ml (about 2 shot glasses) to a bucket containing 5 litres of warm water.

3

## APPLY THE CLEANING SOLUTION

The microfibre pad should be damp with cleaning solution, not soaked. Wash out the dirty microfibre pad in the second bucket (containing only water). Repeat step 3.

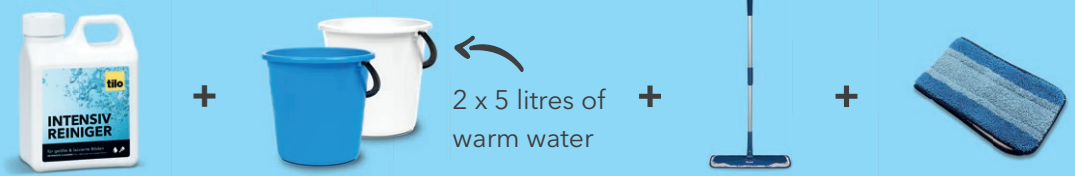

- ! Never leave floors damp over a long period or let them get wet!
- ⚡ Wash the Microfibre pad Blue in a washing machine at 60°C and reuse next time.

# Intensive Cleaner

You need:

1

## SWEEP/HOOVER

Remove coarse dirt with a broom or Hoover.

2

## PREPARE THE CLEANING SOLUTION

Shake out the INTENSIVE CLEANER and add about 0.5 litres to a bucket containing 5 litres of warm water.

3

## APPLY THE CLEANING SOLUTION

The microfibre pad should be damp with cleaning solution, not soaked. Wash out the dirty microfibre pad in the second bucket (containing only water). Repeat step 3.

4

## WIPE WITH WATER

Wipe the floor with clean water.

5

## DRY AND CARE

Leave the floor to dry for about 4 hours and **then apply the Intensive Care.**

- ! Never leave floors damp over a long period or let them get wet!
- ⚡ Wash the Microfibre pad Blue in a washing machine at 60°C and reuse next time.

Watch the VIDEO.

# Quick Care

You need:

1

## CLEAN FLOOR

Move any furniture to one side. Clean the floor with SOAP CLEANER and leave to dry (see instructions for SOAP CLEANER).

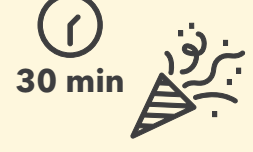

2

## FLOOR CARE

Shake out QUICK CARE. For oiled floors, spread the QUICK CARE on the microfibre pad, for varnished floors shake out QUICK CARE directly on the floor. Apply a thin and even layer on the floor.

3

## WAIT AND CELEBRATE

Wait just 30 minutes and then marvel at how good your floor looks and celebrate!

- ! Do not apply too sparingly, otherwise streaks will form. Work on large surfaces in sections and work from wet to dry. Use in normal air humidity and at room temperature.
- ⚡ Wash the Microfibre pad Blue / Yellow in a washing machine at 60°C and reuse next time.

Watch the VIDEO.

# Intensive Care

You need:

1

## CLEAN FLOOR

Move any furniture to one side. Clean the floor with INTENSIVE CLEANER and leave to dry (see instructions for INTENSIVE CLEANER).

2

## FLOOR CARE

Shake out INTENSIVE CARE. For oiled floors, spread the INTENSIVE CARE on the microfibre pad, for varnished floors shake out INTENSIVE CARE directly on the floor. Apply a thin and even layer on the floor.

3

## WAIT AND CELEBRATE

You can use the floor again after 6 hours, after 24 hours it has completely cured and can withstand stress. Now marvel at your floor and celebrate!

- ! Do not apply too sparingly, otherwise streaks will form. Work on large surfaces in sections and work from wet to dry. Use in normal air humidity and at room temperature.
- ! Soak the Microfibre pad Blue in water and dry in fresh air before discarding it in residual waste.
- ⚡ Wash the Microfibre pad Yellow in a washing machine at 60°C and reuse next time.
