NEXT LEVEL

SOFTSYNCHRON

/DESIGN

Next level: Softsynchron

Every knothole, every crack, every bump and ridge is gently embossed exactly where it is visible.

NOVO Oak Macadamia

VINYL FLOORS - COUNTLESS **design options.**

A vinyl floor from tilo leaves nothing to be desired. Vinyl is the all-rounder of the flooring world, as it's durable and available in every look.

A decorative film is used to produce the appearance of vinyl floors. Limitless designs are possible. As well as replicating the look, special technologies

can also recreate the feel of real wood or stone. With the softsynchro feel, the wear layer of the vinyl fully matches the decorative film. This means you can truly feel the wood characteristics, giving you the most authentic vinyl floor produced so far.

NATURAL FEEL THANKS TO **softsynchro embossing.**

softsynchro embossing represents the next level of vinyl embossing. Every knothole, every crack, every bump and ridge is gently embossed exactly where it is visible. Thanks to this sophisticated technology, softsynchro embossed vinyl floors are barely distinguishable from real wood in terms of not just their look but also their feel. They have an in-

credibly natural and pure effect. In this case, softsynchro also means that the embossing is particularly smooth and low key, making the result even more authentic. The sensation underfoot is incomparable and the wood design extremely natural, even though it's still a vinyl floor.

HDF vinyl construction

- 1 0.3 mm vinyl
- 2 LVT film design
- 3 Multi-layer support vinyl
- 4 High density fibreboard
- 5 Cork impact sound insulation

Vinyl and its benefits.

■ It's tough

Not only do vinyl floors look good, they are also extremely durable, making them suitable for universal use throughout your home.*

■ Deceptively realistic

The gently embossed, softsynchro feel represents the next level of vinyl embossing, creating a natural finish and pleasant sensation underfoot.

■ Easy cleaning

Dirt doesn't stick readily to the Twist PLUS varnished surface, which makes vinyl floors easy to clean and incredibly easy to maintain.

* Not suitable for damp locations. Please see our rigid vinyl and glued vinyl products.

NOVO Oak Kalahari

The trend towards more natural qualities is continuing. We achieve this exact effect with the softsynchro embossing, which makes robust vinyl floors look deceptively realistic.

■ **Impact sound insulation included**

tilo vinyl floors feature integrated impact sound insulation made of cork. This saves you both time and money.

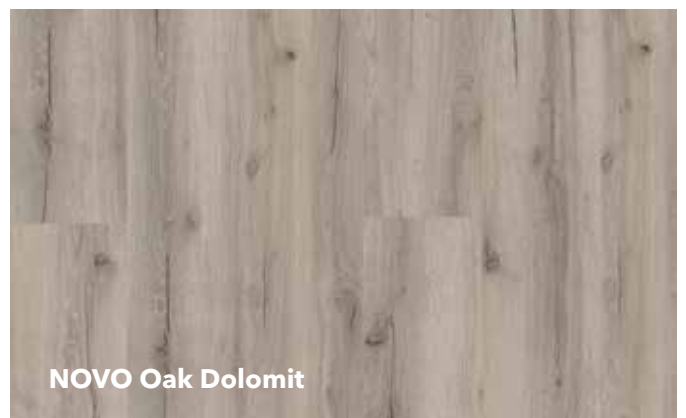

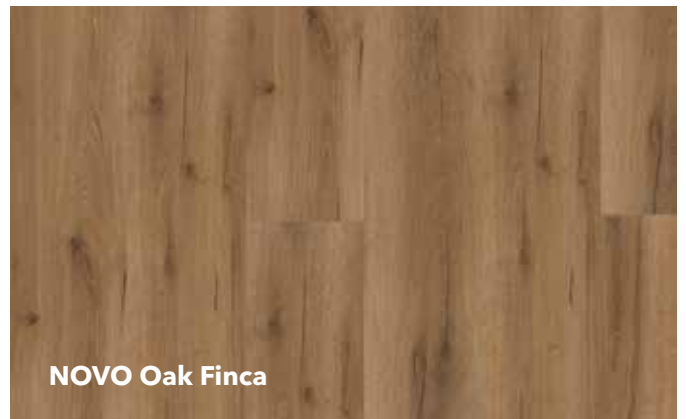

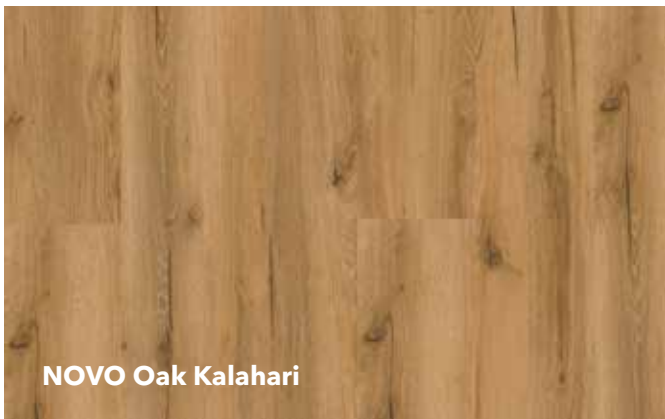

■ **Certified with TÜV PROFICERT**

The tilo production facilities in Lohnsburg are audited once a year by an external, accredited testing institute. In addition to this, tilo floors are tested for emissions, to ensure that the manufactured products "promote healthy living".

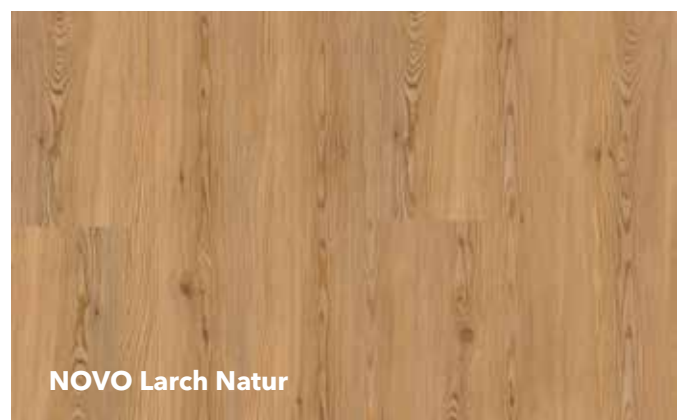

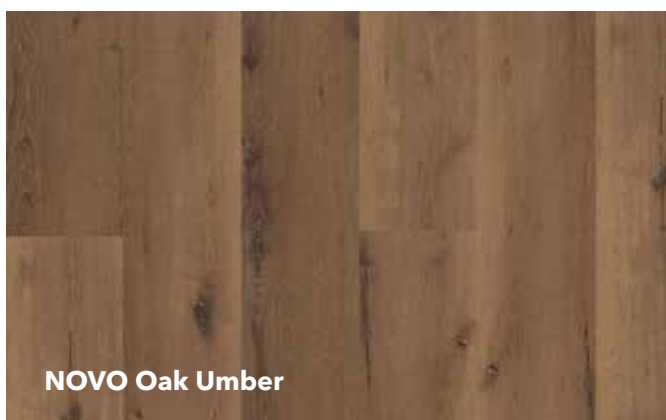

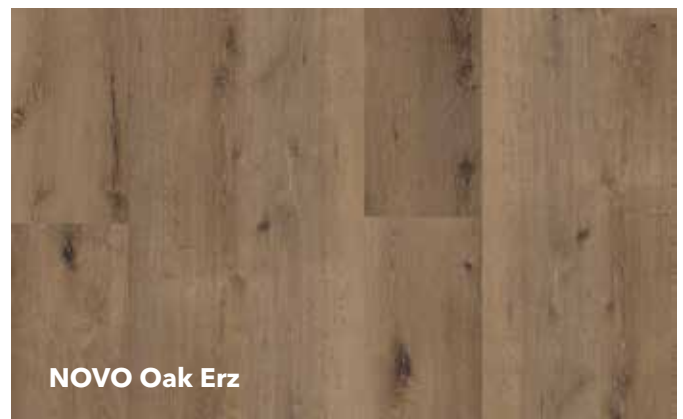

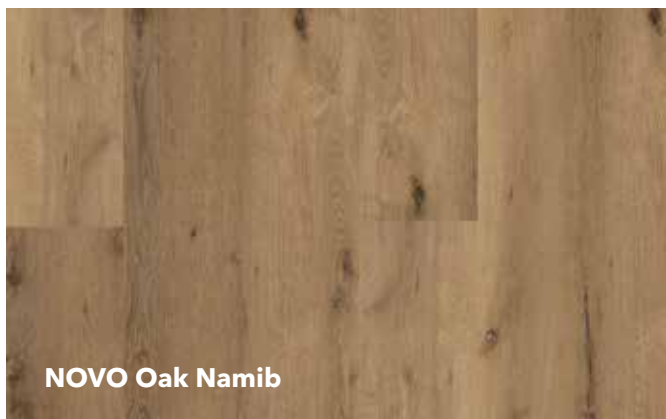

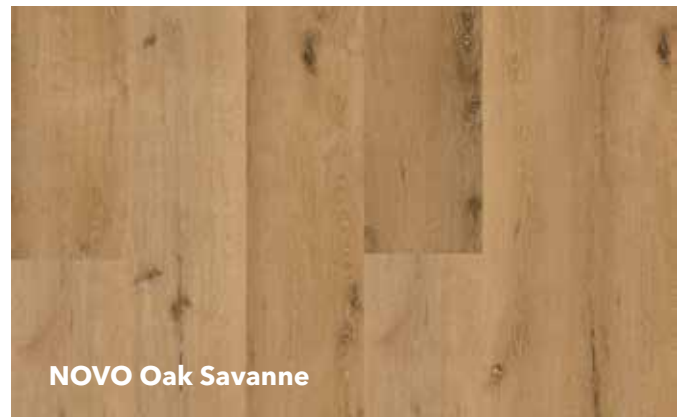

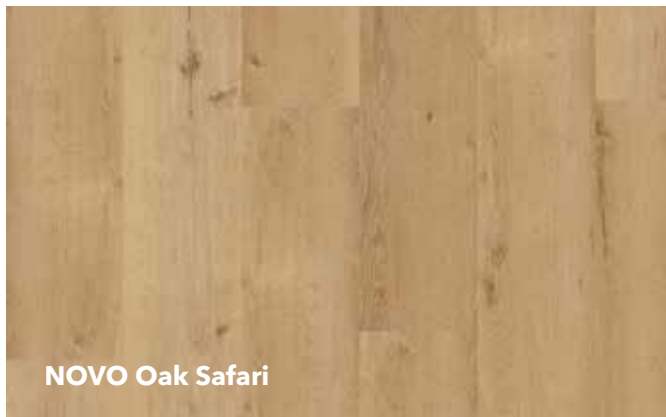

■ **Production in Austria**

We use our knowledge and expertise here in Innviertel to bring real Austrian quality to your home.

Available in 12 colours.

From a natural appearance to subtle pastel tones – the 12 colours in the NOVO collection offer the perfect backdrop for any interior style.

**FLOORS FROM
AUSTRIA**

Quality with vision.

Made in Austria.

With our premises on the edge of the Kobernaußerwald forest, we are uniquely placed to appreciate the benefits of healthy forests. That is why we place great importance on sustainability, from our raw materials to the finished product. As an FSC® and PEFC certified floor manufacturer, we have a particular concern for where our raw materials come from and, in so doing, actively contribute to the preservation of forests together with you as a buyer of tilo floors.

More than seventy years of experience combined with innovative technologies.

This is the basis for the consistently high quality of our products. Down-to-earth, but always with our finger on the pulse, we continuously invest in the development of our production site in Lohnsburg and therefore also in our future. In combination with digital transformation and the establishment of higher standards, we are setting true milestones in terms of quality and as an employer in the region.

tilo Floor Layer app

A whole new way to **experience our floors.**

We have the opportunity to shape the floors of tomorrow, today - and we have grasped it! This also means that we need to make designing floors as simple and appealing as possible for our customers. For example, with our new, easy-to-use **tilo Floor Layer app**: just a few clicks, and you can see how your favourite tilo floor looks in your own home. Simply download it from the Google Play Store or Apple App Store, select the floor of your dreams and fit it in real time in your own room.

Simply scan the QR code and download the app.

TIP: Want to see how a tilo floor looks in real life in your home? Then use the **tilo floor box**! Simply choose different floor samples from the tilo website and have them sent to your home.
