Stone reimagined.

Hard look. Smart core.

STONE LOOK IN VINYL.

Progress is not about how technical a solution sounds, but about what it makes possible. ELEGANTO preserves what we value in stone: precise aesthetics and a generous format. At the same time, it offers noticeable comfort and flexible installation. ELEGANTO combines the impact of stone with the demands of modern living.

MORE IMPACT.

Large formats, authentic decors and a surface that not only looks like stone, but feels like it too.

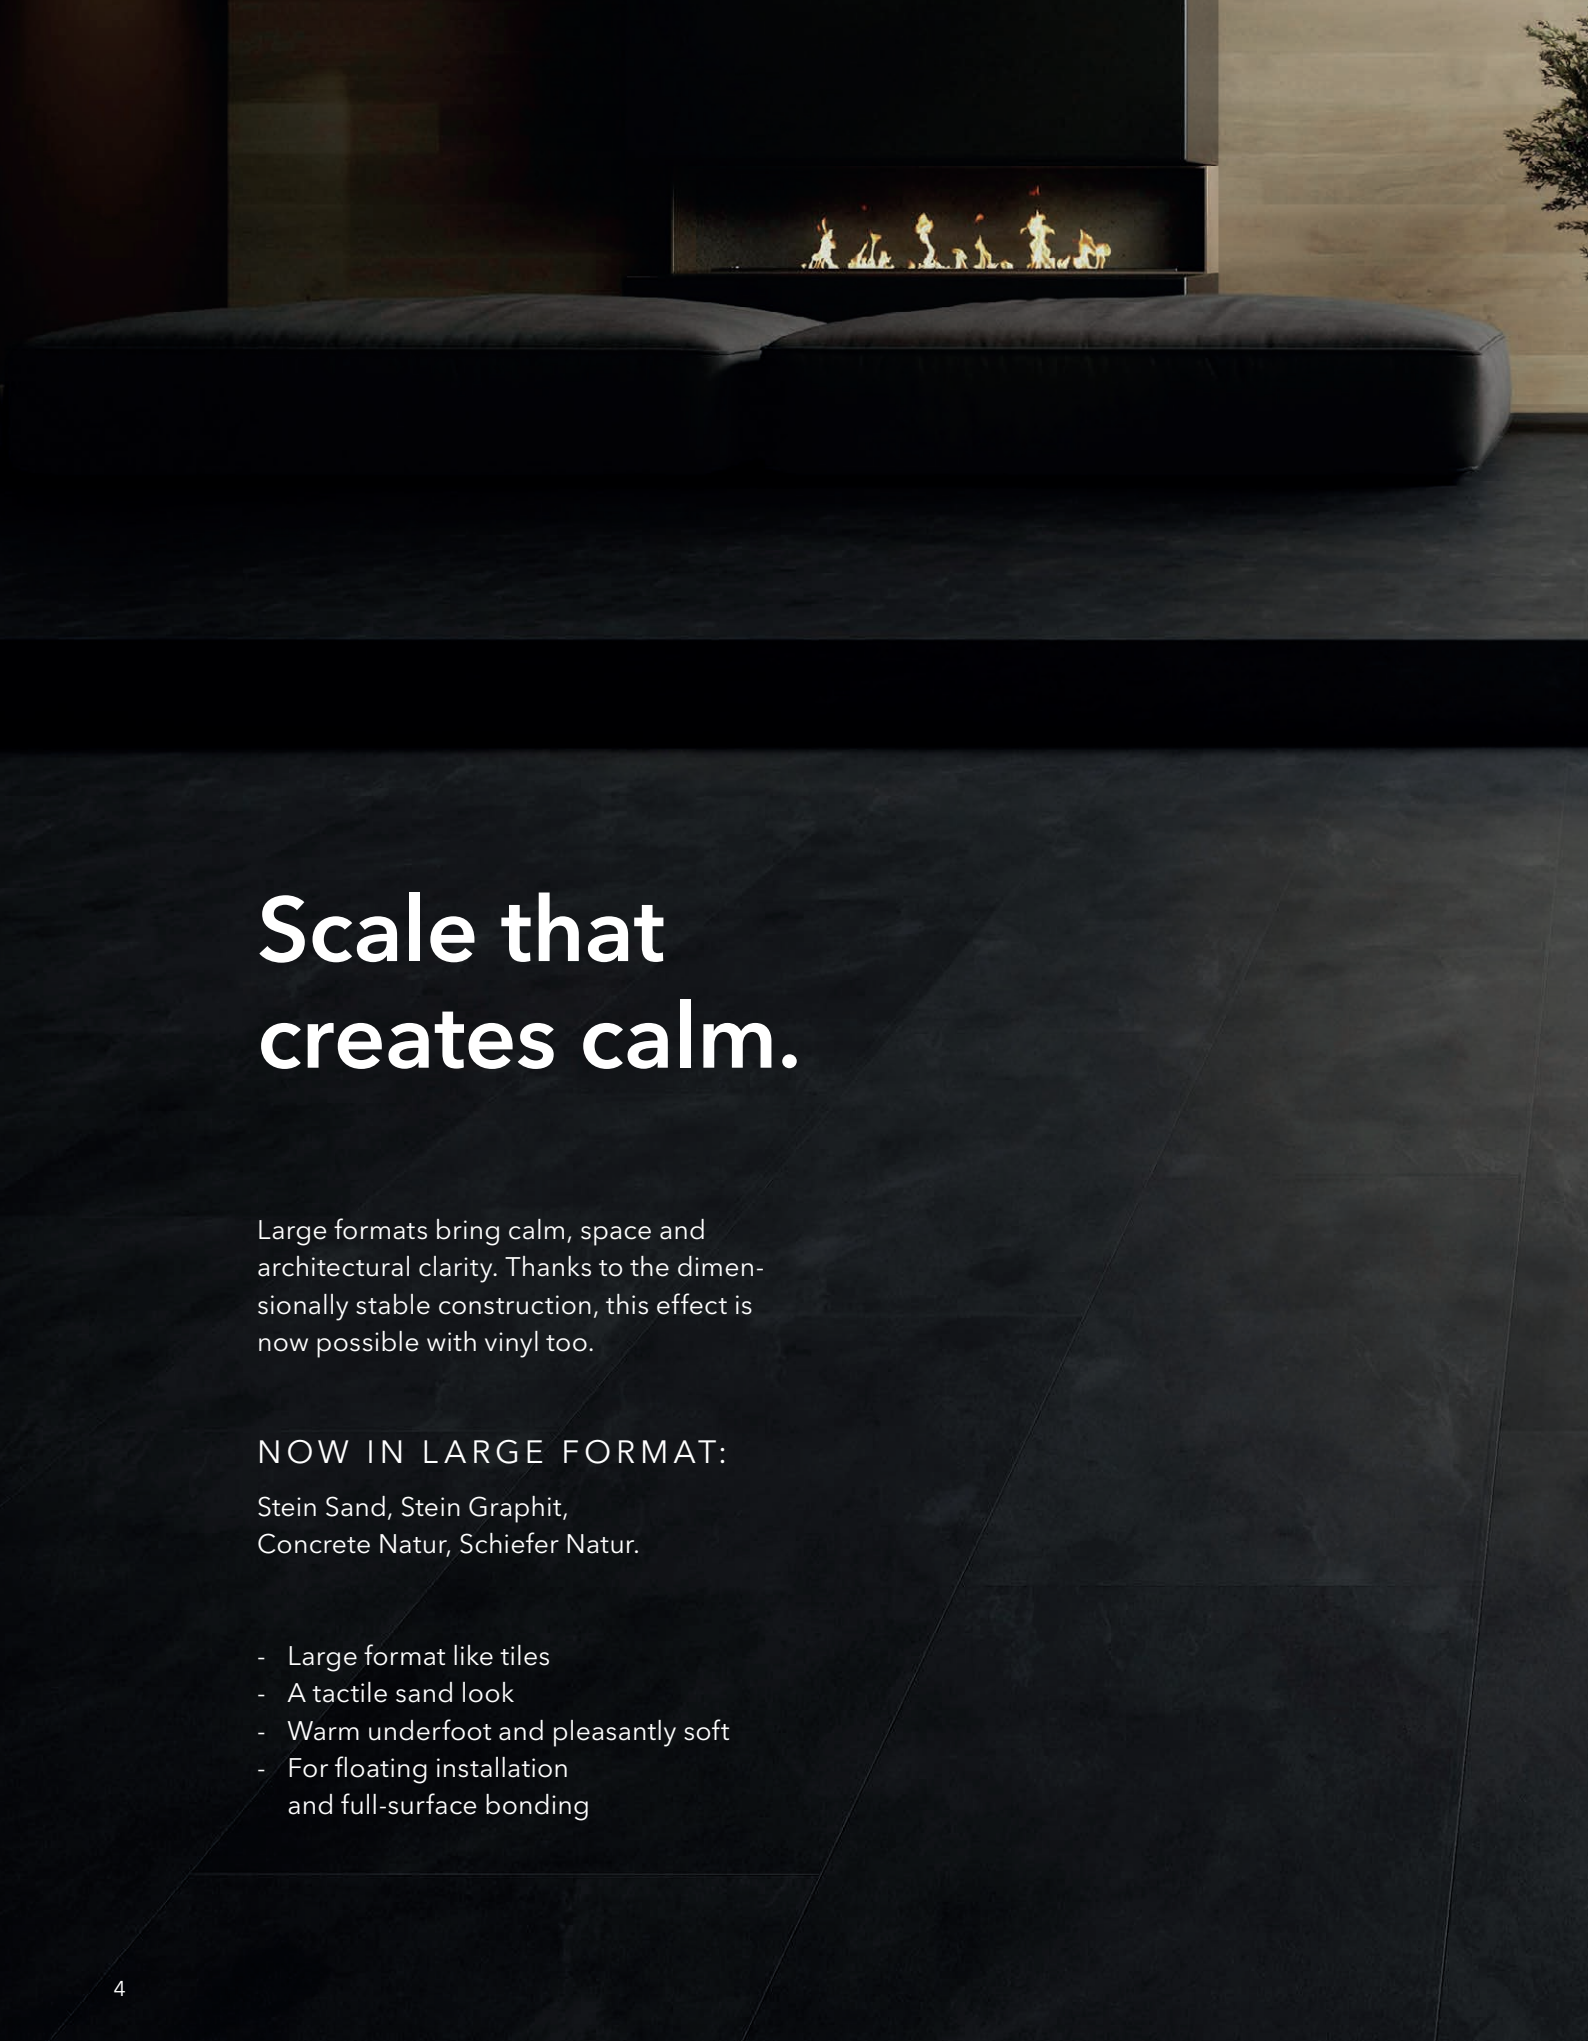

MORE COMFORT.

The clean aesthetics of stone – pleasantly soft, warm underfoot and comfortable every day.

MORE FREEDOM.

Install as a floating floor or fully bond to the subfloor. Create a continuous design across rooms and applications.

Scale that creates calm.

Large formats bring calm, space and architectural clarity. Thanks to the dimensionally stable construction, this effect is now possible with vinyl too.

NOW IN LARGE FORMAT:

Stein Sand, Stein Graphit,
Concrete Natur, Schiefer Natur.

- Large format like tiles
- A tactile sand look
- Warm underfoot and pleasantly soft
- For floating installation
and full-surface bonding

Six stone looks. Different room effects.

The floor gives a room its character. Colour, texture and format determine whether it feels calm, spacious, warm or bold. Stone decors create a clear, timeless foundation. They look premium and architectural and can be combined in many ways.

One system. One look.

Good design connects. That is why the system carries the chosen look from the floor to the stairs and through to the matching skirting board.

What makes it special: tilo also makes stairs from rigid vinyl. This creates a seamless room concept - consistent in decor, material appearance and style.
