

The image shows a minimalist interior space with a light-colored wood-look parquet floor. A large glass wall on the right side of the frame provides a panoramic view of a lake and a city skyline at dusk. The sky is a mix of blue and purple, and the city lights are visible across the water. Inside, there is a dark, low-profile sofa on the left and a wooden bench near the glass wall. The overall atmosphere is serene and modern.

**Disrupt the
ordinary.**

PROGRESS BEGINS WHEN WE STOP
ACCEPTING THINGS AS THEY ARE.
WHEN QUESTIONS ARE MORE IM-
PORTANT THAN ANSWERS. WHEN
CURIOSITY PIQUES AND THE DE-
SIRE TO CREATE SOMETHING NEW
CAN NO LONGER BE SATIED. FRESH
THINKING DOESN'T EMERGE FROM
A LABORATORY, BUT INSTEAD FROM
WHERE WE LIVE.

Harnessing
the power
of nature.

WOOD BREATHES

Natural air conditioning.

Wood is a special material. It has a natural ability to absorb and release moisture in the air (a process known as hygroscopicity), giving rooms with a wooden floor a pleasant indoor climate. What's more, the low thermal conductivity and uneven surface of wood draws less warmth

from the body than artificial materials like metal, concrete or glass - essentially like an organic air conditioning system. tilo has been an expert in harnessing the properties of wood for decades, blending them with our expertise from the world of vinyl.

BRUSHED
(nature-synchron)

SANDED

SCRAPED

A DELIGHT
FOR THE SENSES

Bringing nature to life.

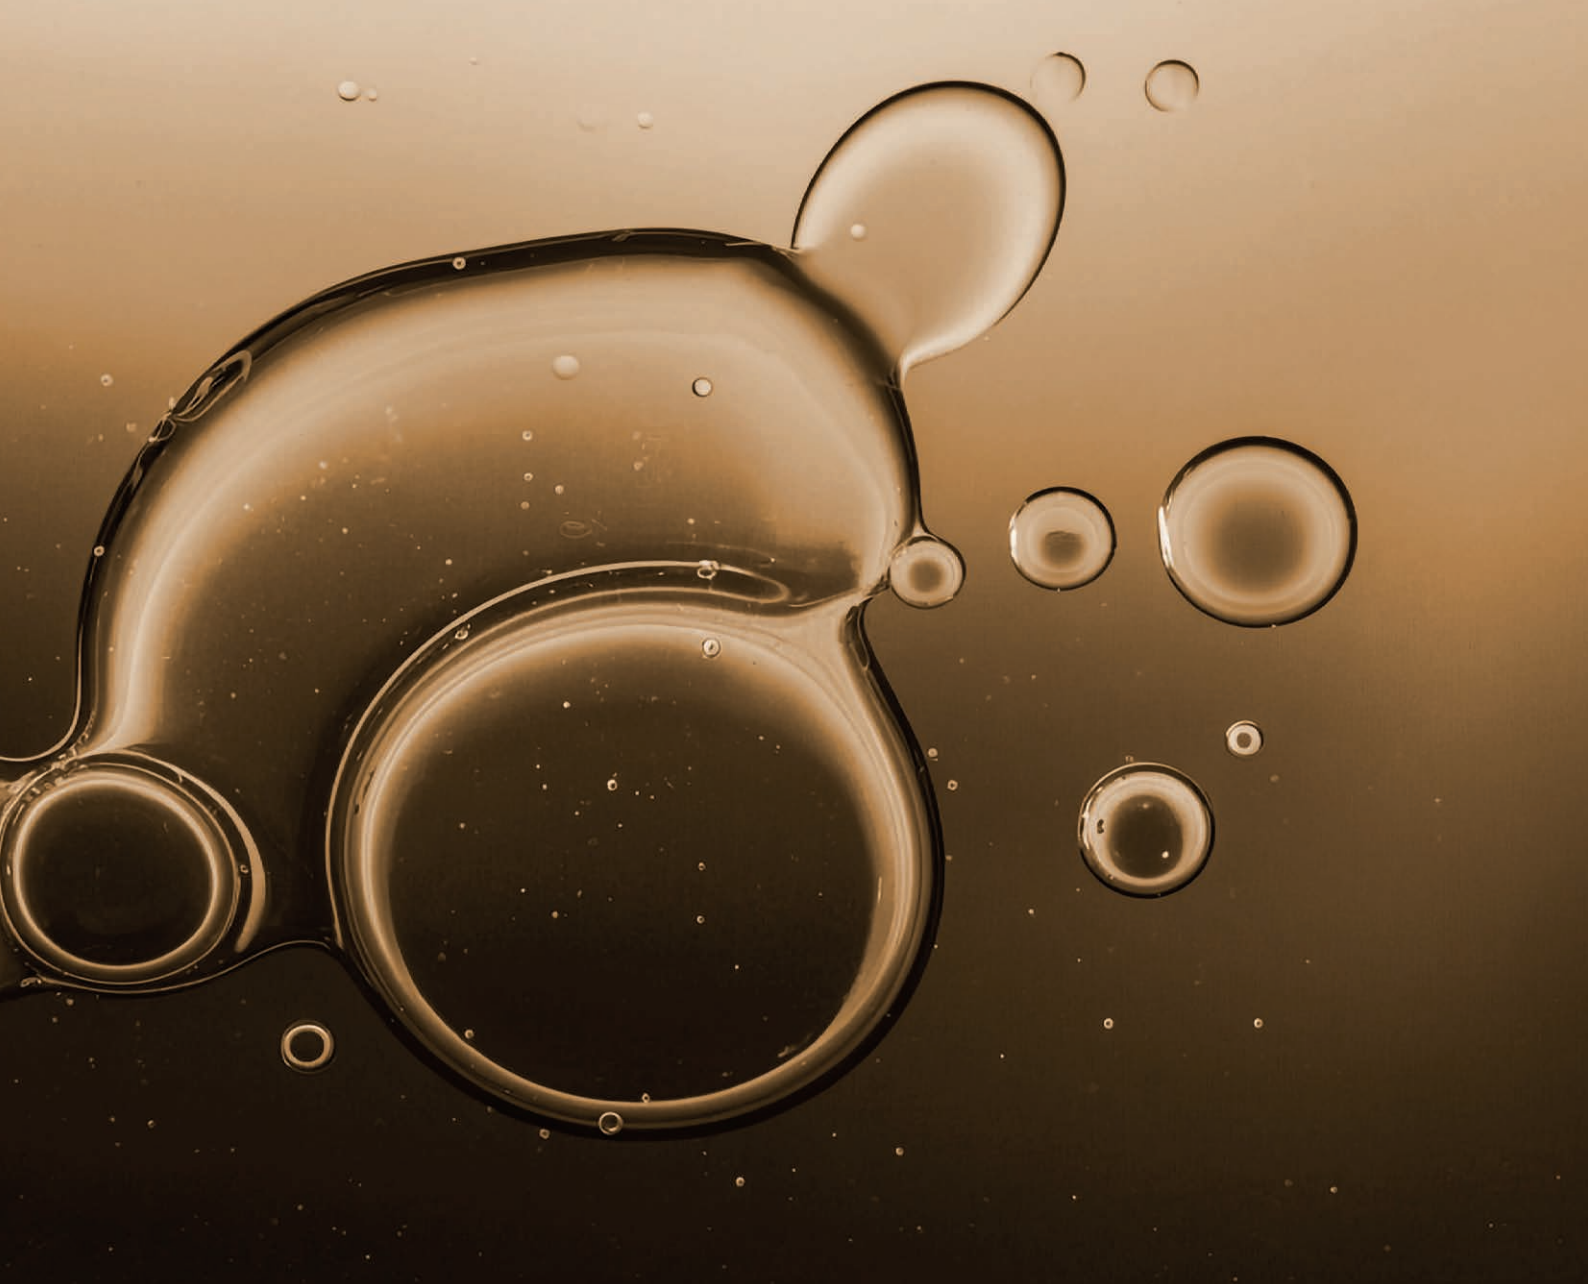

Nature should not just be seen, but experienced. Neither too hard nor too soft, the ideal surface structure of parquet feels reassuringly calm to the touch. Smooth surfaces like glass or stone evoke a sense of coolness, whereas uneven, brushed or scraped textures are warm and vibrant. Combine brushed or scraped surface structures with smooth or soft textures to create a distinctive look and feel.

INVISIBLE PROTECTION

Perfectly engineered surfaces.

THE MORE NATURAL THE SURFACE,
THE LOWER ITS RESISTANCE. HOWEVER,
TILO HAS COME UP WITH FASCINATING
WAYS OF COMBINING ROBUSTNESS
WITH A NATURAL LOOK.

Innovo NATUR oil

Innovo NATUR oil is the perfect symbiosis of oil and varnish. It penetrates into the pores and also deposits a protective film over the surface of the wood, making it more hard-wearing while retaining its authentic appearance.

Twist PLUS matt varnish

Varnish forms a closed film that protects the floor from wear, scratches and moisture. Twist PLUS matt varnish provides long-term durability without compromising the matt, natural look.

powerFIX

PATENTED
CONNECTION SYSTEM

POWERFIX
CONNECTION SYSTEM

Stability guaranteed.

At the heart of our powerFIX locking system lies birch – a very special kind of wood. Extremely resistant to bending and compression, it can withstand stress while its unique elasticity ensures long-lasting precision. These properties make birch the ideal material for the transverse profile of our powerFIX positive locking system. Precisely milled to shape and without the need for any additional materials, the birch profile fits seamlessly into the structure for a stable, reliable hold. The force that arises during installation is stored in the profile, fixing the planks in a secure position.

CARAMEL

INTELLIGENT THERMAL TECHNOLOGY

**Natural
solid colour.**

Caramel is the embodiment of material intelligence: a wood that looks good and ages well. Unlike conventional techniques, the thermal process doesn't just dye the surface of the wood. Instead it penetrates the material with heat, browning and 'caramelising' the wood all the way through. The result is an intelligent surface that doesn't show scratches, as even the sublayers are the same colour. Caramel is part of the CoreColor Concept - six natural colours in PURE, INTENSE or PASTEL.

A photograph of a modern interior space. In the foreground, a wide, open wooden staircase with light-colored wood treads and a concrete wall on the left side. The staircase leads up to a second level. In the background, a dining area with a dark table and blue chairs is visible. A large window on the right side offers a view of a city at night. The floor is made of light-colored wood planks. The overall atmosphere is warm and minimalist.

A landscape photograph of a snowy mountain slope. In the foreground, a snow-covered hillside with some rocky patches leads up. Several tall evergreen trees are silhouetted against a sky with soft, warm colors from a sunset or sunrise. The trees are dark against the lighter sky. The overall mood is serene and quiet.

One world.
Two perspectives.

tilo

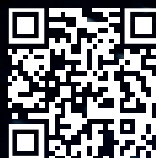

From opposites comes impetus. From two perspectives comes one solution. We combine the status quo with progress, nature with technology and wood with plastic to create ground-breaking innovation. Standing still is not an option.

Technology

connects.

We bring the beauty of nature to vinyl - with soft-synchron structures and colours that breathe life into spaces and dimensions that create expansiveness. And we bring the functionality of vinyl to parquet - with stable connections, easy-to-maintain materials and innovative technologies like oiled surfaces and integrated varnished finishes. Two seemingly opposing worlds that we at tilo bring together in perfect harmony.
